CCTV

Video verification and site monitoring

OREP integrates CCTV in the perimeter protection system in order to establish a monitoring follow up and a video verification if necessary.

Studies and configurations further the needs

Wide choice in the camera range

Possible to integrate the video monitoring in our PERIVISION software

Video detection by image processing

Essential for the protection of high risk industrial sites

OREP

CCTV

Video verification
and site monitoring

Description

OREP design video monitoring architectures by using the adapted product further the needs.

The Experience and knowledge allows

OREP to insure the global management of the project as a supplier and installer of the complete systems and turnkey projects. OREP is an expert in the implementation of complex systems involving all kinds of cameras, optical fiber, industrial equipments (switch, transceiver...) and input/output cards (ZUC IO/IP).

The ZUC IO IP board allows the CCTV system to be linked to the anti-intrusion alarm system.

Features

Type of Cameras

- ✓ Fix Camera
- ✓ Dome Camera
- ✓ Turret Camera
- ✓ Thermal Camera

Option and Accessories

- ✓ Infrared lighting
- ✓ Explosion proof enclosures
- ✓ Video Detection Software
- ✓ Tracking function
- ✓ Optical fiber network
