

PRESS RELEASE
LYON, July 4, 2023

OREP continues to strengthen its presence in the Middle East.

OREP, leader in perimeter protection in France, is specialized in the design, manufacture, installation and commissioning of detection systems.

OREP mission is to support the market actors in the realization of perimeter protection projects.

From design studies, to overall project management, through the manufacture and supply of materials and solutions, OREP has become a key player with perimeter security systems in France and around the world.

OREP fields of application have been quite large over the years: *Petrochemical, Oil & Gas, Nuclear power plants, Power plants, Airports, Military zones & Ammunition dumps, Prison, Electric substation, Nuclear research center, Industrial installations, Borders, Testing area, Arsenals...*

In line with its desire to expand across the Middle East, OREP is proud to announce its new partnership with **Security Middle East Magazine**.

This partnership is a great opportunity to strengthen our presence in the Middle East and emphasize our willingness to partner with key actors of the GCC countries to provide our expertise with PIDS.

About OREP:

OREP was founded in 1972, during the phase of the French electro-nuclear program. It specializes in the field of perimeter protection for sensitive sites with strategic importance for major institutions or for export. OREP has positioned itself as a major player in the market since the 1980s and continues to develop by renewing the design and interest of its products by meeting the needs of its customers through innovation.
